About Me

I'm a final-year Computer Science student and a freelance UI/UX designer with a strong focus on frontend development. I build responsive, user-friendly websites using modern technologies like HTML5, CSS3, JavaScript (ES6+), and React, blending clean code with engaging design.

WORK EXPERIENCE

Jul 2023 – Present

Freelance Web & Graphic Designer – Fiverr

- Designed flyers, social media posts, magazines, and 2D landscape site plans for clients worldwide
- Developed and customized responsive websites using WordPress and Wix
- Focused on user-friendly layouts and modern, visually appealing designs

Jan 2024 – Present

Frontend Developer – Personal Projects + FYP

- Built small web apps and landing pages using HTML, CSS, JavaScript, and React.js
- Practiced integrating APIs and adding interactive UI components
- Shared code on GitHub to demonstrate technical skills and growth
- I recently worked on the frontend of my final year project this semester, which is a donation web-based platform. We are developing the frontend using React.
