About Me

I'm a fresh Computer Science graduate with a growing passion for web development, having good experience in React and entry-level experience in Express and Node.js. I can build responsive, interactive, and user-friendly full-stack websites with clean code and an engaging, smooth user experience.

WORK EXPERIENCE

Jul 2023 – Present

Freelance Web & Graphic Designer – Fiverr [View Profile](#)

- Built responsive frontend websites with HTML, CSS, Js and using CMS based platforms.
- Developed and customised dynamic sites using WordPress, Wix, and Bubble.io.
- Designed professional logos, banners, brochures and flyers for clients worldwide.

November 2025

Web Developer – University Final Year Project [View Project](#)

- Developed a web-based AI-powered donation platform named Aid-Link.
- Built the frontend using React.js, managed PostgreSQL for structured data storage, and developed the backend with Django REST Framework.
- As frontend and database developer, focused on responsive UI, efficient database queries, and seamless API integration.
