About Me

I'm a Computer Science graduate and web developer with expertise in React and Node.js. I build full-stack, responsive, and user-friendly websites using modern technologies like HTML5, CSS3, and JavaScript (ES6+), blending clean code with thoughtful UI/UX design for seamless digital experiences.

WORK EXPERIENCE

Jul 2023 – Present

Freelance Web & Graphic Designer – Fiverr [View Profile](#)

- Built full-stack responsive websites with React, Node.js, and database integration.
- Developed and customised dynamic sites using WordPress, Wix, and Bubble.io.
- Designed professional logos, banners, and flyers for clients worldwide.

November 2025

Web Developer – University Final Year Project [View Project](#)

- Developed a web-based AI-powered donation platform named Aid-Link.
- Built the frontend using React.js, managed PostgreSQL for structured data storage, and developed the backend with Django REST Framework.
- As frontend and database developer, focused on responsive UI, efficient database queries, and seamless API integration.
